

How to Create a New Project in IRBNet

1 On the My Projects page, click the tab on the left titled "Create New Project."

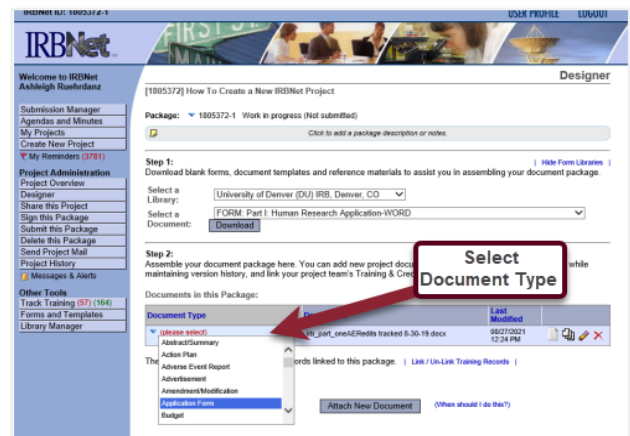

2 You can use any title you want that describes the project, but we suggest you keep the title the same as it's used in other places, such as grant proposals.

3 Select "University of Denver" and the appropriate compliance board and search for the document you need.

Once you've completed each required document, return to this page to attach it.

4 To minimize delays in the review process, we ask that you name each document clearly and concisely so that it can be quickly located and differentiated from other documents.
